

# Ultimate™

After establishment, crops need proteins for development and nutrients that counter balance the external and internal stresses of development. Nutrients that enhance Nitrogen conversion and Amino Acids that increase microbial activity are especially important.

The Potassium component of Ultimate is critical for plants for water movement, energy production and the activation of enzymes that promote overall plant strength.

The combination of complexed and chelated ionic nutrients in Ultimate provides the optimum solution for strong and vibrant turf.

## Benefits

- Ultra-low application rates
- Enhances Nitrogen metabolism and protein development
- Promotes uniform maturity and production
- Enhances plant strength and resistance to drought and temperature extremes
- Clean, easy handling solution
- Low impurities

## Guaranteed Analysis 3-0-3

Total Nitrogen (N).....	3.00%
Available Phosphorus (P2O5).....	0.00%
Soluble Potash (K2O).....	3.00%
Iron (Fe).....	0.50%
Manganese (Mn).....	0.50%
Zinc (Zn).....	0.50%

Derived From: Protein Hydrolysate, Potassium Citrate, Sodium Borate, Copper Sulfate, Ferrous Sulfate, Manganese Sulfate and Zinc Sulfate.

## Application Rates

	/100m2	/hectare
Foliar Application	47ml – 93.5ml	4.7L – 9.35L
Soil Spray/ Drench	47ml – 93.5ml	4.7L – 9.35L
