

OxyTurf is a unique, patented plant extract product that is applied to sports and turf systems.

OxyTurf is applied on turf systems to resolve specific conditions but also applied as part of a monthly spray program.

OxyTurf is commonly used as the core of turf treatment programs.

Treatment successfully impacts

Relieves plant stress.

Nutrients are absorbed directly by the stomata, or by the roots in the soil drench.

Black Layer reduction

Reduces anaerobic Conditions

Prevents water Logging

Reduces compaction

Improves root development

Reduces disease pressure

Activates Aerobic microbes and enzymes

Reduces organic load

Systematically breaks down thatch

Improves Nitrification Cycle

Reduces nutrient leaching

Recovery after cultural practices

Improves firmness of playing surfaces

Application

Lawn systems

Golf courses

Sports fields & Stadiums

Horse Race Tracks

Polo Fields

Hybrid turf Systems

Artificial Turf Systems
