

# RUSH™

**RUSH is designed to:** naturally increase water clarity and enhance the nutrient-consuming activity of beneficial bacteria which will reduce organic pond debris.

**What to expect with RUSH:** a reduction of the organic compost and floating organic matter on the surface of the pond. **RUSH** naturally improves water health and clarity through oxygenation.

## RUSH DIRECTIONS FOR USE

Calculate total gallons to be treated:

*Length x Width x Depth x 7.5 = Total Gallons*

One pound of RUSH treats approximately 10,000 gallons of water.

1. Broadcast the product directly on the floating matter.
2. **DO NOT ADD** Simplot microbial products for up to 12 – 24 hours after treatment.
3. Dosage can be doubled for extremely stagnant water with low oxygen levels and severe odor.

For technical service – contact Simplot at 1-800-635-9444.

**Simplot WaterPack®**

*To calculate the total gallons in a pond or lake see label for instructions.*

## WATER MAINTENANCE

Ponds do not take care of themselves. That is why we recommend that every pond owner develop a personal Simplot water management product plan.

Monitor your pond weekly for clarity and floating material. This allows you to identify and respond to potential problems before they start.

**RUSH** is the product of choice for treating low oxygen environments; as well as floating organic matter;

## SIMPLOT PRODUCTS

Achieve increased water clarity and improve water health naturally by using Simplot products:

**AquaSpherePRO** Maintain your pond by using the AquaSpherePRO, which is the easiest maintenance product on the market; it works 24 hours a day, seven days a week, for up to 30 days.

**VISTA** is the product of choice for treating water with excess nutrients and organic materials.

**BLAST** for quick treatment of severely contaminated and stagnant water environments.
