

TRUE-SURFACE® TREKKER™

**Attach True-Surface®
to your walk behind
greens mower!**

12 MORE USES FOR YOUR WALK BEHIND GREENS MOWER

The True-Surface® Trekker™ allows you to **complete 12 different cultural practices** by attaching to your walk behind greens mower. The True-Surface® Trekker™ Vibe Σ ™ converts your mower into a vibratory greens roller; allowing you not only to roll, but also to **vibrate-in topdressing** as well.

The True-Surface® Trekker™ Greens Care Collection allows your mower to do 11 different cultural practices by switching among the **11 interchangeable inserts**. IT'S FAST & EASY!

1. Vibratory Greens Roller
2. Vacu-Cutter™ 45 Blades
3. Vacu-Cutter™ 32 Blades
4. Vacu-Groomer™
5. Vacu-Scarifier™
6. Vacu-Brush™ Super Soft
7. Vacu-Brush™ Soft
8. Vacu-Brush™ Firm
9. Deep Slicer
10. Star Slitter
11. Greens Spiker
12. Non-Vibratory Roller

COLLECT ALL 11 INSERTS!

Switch from one greens maintenance job to the next without the hassle of switching machines. The True-Surface® Trekker™ GCC will provide 11 different cultural practices. Couldn't you use one on your course? Call today to get a demo, and see the benefits of having 1 machine do 11 different greens care cultural practices.

True-Surface® Trekker™ Vibe ∇™

Keep your greens healthy and smooth with the True-Surface® Trekker™ Vibe ∇™. A university study proves that rolling your greens will **improve turfgrass health, increase speed, and provide consistency.**

More than just a rolling unit, the True-Surface® Trekker™ Vibe ∇™ is the **least disruptive** method to shake-in sand topdressing, remove morning dew, smooth your greens after core aeration, and help eliminate sand bridging in aeration holes.

BENEFIT FROM TRUE-SURFACE® VIBRATORY ACTION

A university study proves that you can vibrate 45% more topdressing into the turf canopy using True-Surface® Vibratory Rollers instead of brooming alone. It's unique vibration methods energize the turf by sending light vibrations through the greens, allowing them to vibrate the sand into the turf canopy and ensure deeper penetration into the root zone.
